

TiMOTION Declaration of Conformity: RoHS

The EU Directive 2011/65/EU, effective January 2013, restricts the use of the following 6 substances: Lead, Mercury, Hexavalent chromium, Polybrominated biphenyls, and Polybrominated diphenyl ether to a maximum concentration of 1000ppm. A limit level of 100 ppm has been placed on Cadmium.

Annex III of the directive allows for some exemptions based on the intended use of the product.

With the amendment of Directive 2011/65/EU on March 31, 2015 (Directive 2015/863/EU), greater restrictions were placed on other substances. Restrictions of four phthalates: DEHP, BBP, DBP, and DIBP, are now covered with a maximum concentration of 1000 ppm. This amendment becomes active on July 22, 2019 for all electronic devices other than medical equipment. The amendment goes into effect for medical equipment on July 22, 2021.

Although, not adopted on a United States federal level many individual states have enacted their own legislation requiring devices sold to meet the thresholds as set forth under the EU Directive 2011/65/EU.

TiMOTION declares that all products comply with the EU RoHS directive 2011/65/EU, either to the standard directly or under the exemptions.

We will closely monitor the changes in the RoHS and continue to update both our products and documents in accordance. Additionally, we will monitor both US Federal and State legislations for additional changes or restrictions.

Thank you,

TiMOTION Team
